SUMMARY

Computer Engineering graduate specializing in UI/UX and Product Design, with hands-on experience designing and building user-centric web applications. Proficient in Figma and AI-powered video generation, with a strong workflow integrating AI tools for research, prototyping, visual design, and video creation. Passionate about building intuitive digital experiences that combine design thinking with intelligent automation.

PROJECTS

Paisa+

[Live Demo](#)

- Designed end-to-end product for a finance platform — user flows, UI screens, and design system covering expense tracking and investment planning.
- Prototyped 4+ features including expense scanner, SIP calculator, live stock insights, and interactive dashboards using Figma
- Developed using React, Tailwind CSS, Node.js, SQL, Clerk Auth, and APIs.

Krishi Mitra

[Live Demo](#)

- Led UX design for a 6+ feature farmer platform — researched low-literacy user needs, mapped user flows, and designed accessibility-focused UI screens.
- Designed verified marketplace, equipment rental flows, weather insights, and service listings with rapid prototyping and iterative design thinking.
- Developed using React, Tailwind CSS, Node.js, Prisma, Clerk, Gemini, and APIs.

Case Study - United UPI

[CaseStudy Link](#)

- Conducted user research and competitor analysis to identify pain points in UPI transactions, split payments, and multi-app tracking workflows.
- Designed concept UI in Figma and NanoBanana with unified transaction tracking, cashback notifications, and motion-enhanced interactions.
